## **Empathy Map Canvas:**

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Here, the users of the solution that anticipates business bankruptcy are the various stakeholders of the project which includes the Business itself, Investors, Employees, Customers and Governments etc. The empathy map canvas given below helps us understand the mindset of the various users.
